Form C-144 CLEZ  
Revised August 1, 2011

For closed-loop systems that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure, submit to the appropriate NMOCD District Office.

### Closed-Loop System Permit or Closure Plan Application

(that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure)

Type of action:  Permit  Closure

Instructions: Please submit one application (Form C-144 CLEZ) per individual closed-loop system request. For any application request other than for a closed-loop system that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure, please submit a Form C-144.

Please be advised that approval of this request does not relieve the operator of liability should operations result in pollution of surface water, ground water or the environment. Nor does approval relieve the operator of its responsibility to comply with any other applicable governmental authority's rules, regulations or ordinances.

Attachment to NMOCD Form C-144 CLEZ, Items number 4 and 5.

### Design Plan

Workover fluids will be circulated to and from the well through appropriate piping using steel tanks, pump trucks, water transports, and or vacuum trucks of adequate volume for the operation. No cuttings are expected to be produced during the operation.

Fencing is not required for an above-ground, closed-loop system. The site will have a sign in compliance with 19.15.3.103 NMAC.

### Operating and Maintenance Plan

Steel tanks, pump trucks, water transports, and/or vacuum trucks, and related piping will be maintained to contain fluids. The equipment will be periodically inspected each day for leaks. The NMOCD District Office will be notified within 48 hours of the discovery of any leak in the equipment. Operations will be suspended and repairs will be started immediately upon the discovery of any leak. Hazardous waste, miscellaneous solid waste or debris will not be discharged into or stored in trucks. Only fluids used in operations will be placed or stored in tanks or trucks.

### Closure Plan

Steel tanks, pump trucks, transports, vacuum trucks, and related piping will be properly maintained. Workover fluids will be hauled to Gandy Marley during and after rig operations. All service equipment necessary for operations will be removed from the site at the conclusion of operations. The site will be reclaimed and re-vegetated once the well is permanently abandoned.

### Site Reclamation

Ocotillo Environmental of Hobbs, New Mexico will reclaim the site. All above-ground equipment in addition to anchors/deadmen will be removed. Soil cover will be the greater of one foot or that which will match the background thickness of topsoil. Soil cover will match the existing grade of the site and will be placed to prevent ponding and erosion of the cover. The area will be re-vegetated using the (*State/BLM*) land mix which is appropriate for the area. The NMOCD will be notified of seeding and when re-vegetation is successful.
