Legacy Reserves Operating LP requests approval for a short continuance of temporary abandonment status of the subject well for a period of 6 additional months. Presently, the current approved temporary abandonment is set to expire on June 16, 2013.

We pressure tested the subject well on 4/17/13 to a test pressure of 645# psig for 30 minutes and the casing tested successfully.

You graciously granted us a 2 year extension on this well in June 2011, following our acquisition of this lease from Cimarex Energy Company of Colorado. However, we had to terminate and defer study and subsequent action on this lease due to engineering manpower constraints.

We are again evaluating this and other temporary abandoned wells on this unit and anticipate starting field operations within the next 30-45 days to either re-activate or PXA this well.
