Form C-144 CLEZ  
Revised August 1, 2011

For closed-loop systems that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure, submit to the appropriate NMOC District Office.

**Closed-Loop System Permit or Closure Plan Application**

(that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure)

Type of action:  Permit  Closure

Instructions: Please submit one application (Form C-144 CLEZ) per individual closed-loop system request. For any application request other than for a closed-loop system that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure, please submit a Form C-144.

Please be advised that approval of this request does not relieve the operator of liability should operations result in pollution of surface water, ground water or the environment. Nor does approval relieve the operator of its responsibility to comply with any other applicable governmental authority's rules, regulations or ordinances.

1.  
Operator: ConocoPhillips Company OGRID #: 217817  
Address: P.O. Box 51810 Midland, TX 79710-1810  
Facility or well name: Ruby Federal #31  
API Number: 30-025- OCD Permit Number: \_\_\_\_\_  
U/L or Qtr/Qtr UL H Section 18 Township 17S Range 32E County: LEA  
Center of Proposed Design: Latitude 32.8359 Longitude -103.79736 NAD:  1927  1983  
Surface Owner:  Federal  State  Private  Tribal Trust or Indian Allotment

## Closed Loop System Design, Operating and Maintenance, and Closure Plan

ConocoPhillips Company  
Well: Ruby Federal #31  
Location: Sec. 18, T17S, R32E  
Date: 7/15/2013

ConocoPhillips proposes the following plan for design, operating and maintenance, and closure of our proposed closed loop system for the above named well:

1. We propose to use a closed loop system with steel pits, haul-off bins, and frac tanks for containing all cuttings, solids, mud, water, brine, and liquids. We will not dig a pit, nor will we use a drying pad, nor will we build an earth pit above ground level, nor will we dispose of or bury any waste on location.

All drilling waste and all drilling fluids (fresh water, brine, mud, cuttings, drill solids, cement returns, and any other liquid or solid that may be involved) will be contained on location in the rig's steel pits or in haul-off bins or in frac tanks as needed. The intent is as follows:

- We propose to use the rigs' steel pits for containing and maintaining the drilling fluids.
- We propose to remove cuttings and drilled solids from the mud by using solids control equipment and to contain such cuttings and drilled solids on location in haul-off bins.
- We propose that any excess water that may need to be stored on location will be stored in tanks.

**The closed loop system components will be inspected daily by each tour and any needed repairs will be made immediately. Any leak in the system will be repaired immediately, and any spilled liquids and/or solids will be cleaned immediately, and the area where any such spill occurred will be remediated immediately.**

2. Cuttings and solids will be removed from location in haul-off bins by an authorized contractor and disposed of at an authorized facility. For this well, we propose the following disposal facility:

R-360 Inc.  
4507 West Carlsbad Hwy, Hobbs, NM 88240,  
P.O. Box 388; Hobbs, New Mexico 88241  
Toll Free Phone: 877.505.4274, Local Phone Number: 432.638.4076

The physical address for the plant where the disposal facility is located is Highway 62/180 at mile marker 66 (33 miles East of Hobbs, NM and 32 miles West of Carlsbad, NM).

The Permit Number for R-360 is NM-01-0006.

A photograph showing the type of haul-off bins that will be used is attached.

3. Mud will be transported by vacuum truck and disposed of at R-360 Inc. at the facility described above.
4. Fresh Water and Brine will be hauled off by vacuum truck and disposed of at an authorized salt water disposal well. We propose the following for disposal of fresh water and brine as needed:
  - Nabors Well Services Company, 3221 NW County Rd; Hobbs, NM 88240, PO 5208 Hobbs, NM, 88241, Permit SWD 092. (Well Location: **Section 3, T19S R37E**)
  - Basic Energy Services, P.O. Box 1869; Eunice, NM 88231 Phone Number: 575.394.2545, Facility located at Hwy 18, Mile Marker 19; Eunice, NM.

# SPECIFICATIONS

## Heavy Duty Split Metal Rolling Lid

**FLOOR:** 3/16" PL one piece  
**GROSS MEMBER:** 3x4.1 channel 16" on center  
**WALLS:** 3/16" PL solid welded with tubing top, inside liner hooks  
**DOOR:** 3/16" PL with tubing frame  
**FRONT:** 3/16" PL slant formed  
**PICK UP:** Standard cable with 2" x 6" x 1/4" rails, gusset at each crossmember  
**WHEELS:** 10 DIA x 9 long with rease fittings  
**DOOR LATCH:** 3 independent ratchet binders with chains, vertical second latch  
**GASKETS:** Extruded rubber seal with metal retainers  
**WELDS:** All welds continuous except sub-structure crossmembers  
**FINISH:** Coated inside and out with direct to metal, rust inhibiting acrylic enamel color coat  
**HYDROTESTING:** Full capacity static test  
**DIMENSIONS:** 22'41" long (21'8" inside), 99" wide (88" inside), see drawing for height  
**OPTIONS:** Steel grit blast and special paint, Amplirell, Heil and Dino pickup  
**ROOF:** 3/16" PL roof panels with tubing and channel support frame  
**LIDS:** (2) 68" x 90" metal rolling lids spring loaded, self raising  
**ROLLERS:** 4" V-groove rollers with delrin bearings and grease fittings  
**OPENING:** (2) 60" x 82" openings with 8" divider centered on container  
**LATCH:** (2) independent ratchet binders with chains per lid  
**GASKETS:** Extruded rubber seal with metal retainers
