Nearburg Producing Company respectfully requests approval to not run centralizers:

It was necessary to set an open hole whipstock at 10,445' MD to deviate this well and drill the curve. To avoid the risk of damage to the whipstock, production casing, or losing the hole, Nearburg requests permission to not run any centralizers on the 5-1/2" production casing below the whipstock. We will run 1 centralizer every 4th joint from 10,400' to 3000' (planned TOC).

14. I hereby certify that the foregoing is true and correct.
