13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

## **Conditions of Approval**

**Chaparral Energy, LLC.  
West Dollarhide Queen Sand Unit 113  
API 3002530231, T24S-R38E, Sec 31**

February 24, 2014

This well's recorded activity has been inactive/shut-in for more than 30 days without authorization. An inactive/shut-in well bore is a non-producing completion that is capable of "beneficial use" i.e. production in **paying quantities** or of service use.

Determine the repairs needed to return the well to "beneficial use" on or before 05/24/2014 (90 day max) in an acceptable wellbore integrity condition. Should casing repairs be prudent, submit a BLM notice of intent for approval of those repairs.

- Should "beneficial use" not be achieved before (NOI approval date + six months) submit for BLM approval a plan for plug and abandonment.
