13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We plan to perform a casing integrity test on the subject well, and, if necessary, will repair casing. After testing casing, and making any necessary repairs, it is our intention to temporarily abandon subject well pending our submittal, and receipt of approval, of a rework application to clean out subject well to 5713', and drill a 671' south-southeast oriented Blinebry horizontal lateral (at an approximate vertical depth between 2110' and 2132' subsea), to a bottomhole location of 1710' FNL and 990' FWL. We will commence the subject Blinebry rework project upon receipt of approval of rework application, when service equipment is available.
