	<input type="checkbox"/> Well Integrity
	<input checked="" type="checkbox"/> Other Change to Original A PD

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

ConocoPhillips Company respectfully requests to amend the method of installation as it pertains to the products line from surface to buried. The route for the pipeline has not changed. The line will be 4" Steel, operated at up to 1480# psi from the well to the Wilder Central Tank Battery. All activity will be kept in the utility corridor already authorized under the APD.

We also request to install a buried 2" Steel gas supply line operated at up to 1100# psi from the well to the Wilder Central Tank Battery. All activity will be kept in the utility corridor already authorized under the APD.

In addition, per conversation with Cody Layton on 02/18/2014, ConocoPhillips Company respectfully requests to amend the Conditions of Approval for the authorized ROW width of 20' in the APD. A larger ROW width is needed for ConocoPhillips Company to comply with our internal safety practices
