	<input type="checkbox"/> Production (Start/Resume)
	<input type="checkbox"/> Reclamation
	<input type="checkbox"/> Water Shut-Off
	<input type="checkbox"/> Well Integrity
	<input checked="" type="checkbox"/> Other
	<input type="checkbox"/> Alter Casing
	<input type="checkbox"/> New Construction
	<input type="checkbox"/> Recomplete
	<input type="checkbox"/> Change Plans
	<input type="checkbox"/> Temporarily Abandon
	<input type="checkbox"/> Plug and Abandon
	<input type="checkbox"/> Convert to Injection
	<input type="checkbox"/> Plug Back
	<input type="checkbox"/> Water Disposal

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

ConocoPhillips Company respectfully submits this subsequent report of Sundry Operations.

History-

ConocoPhillips Co. originally drilled this well beginning February 1, 2014. While cementing the production casing, of a two string design, we did not circulate cement to surface as planned. We performed diagnostic tests as requested by BLM representatives and submitted the results. On March 7, 2014 we completed an approved remedial operation to perform a bradenhead squeeze down the annulus. We cemented across an open hole section and had good cement into the surface casing shoe. Requested tests were again performed and submitted. However, we were not able to complete a satisfactory MIT. Remedial operations were performed using Liquid Bridge Plug technology. Subsequent reports were submitted and concurrence to proceed with completion operations was given.

ACCEPTED FOR RECORD

Conditions of approval, if any, are attached. Approval of this notice does not warrant or certify that the applicant holds legal or equitable title to those rights in the subject lease which would entitle the applicant to conduct operations thereon.

Office Hobbs

Title 18 U.S.C. Section 1001 and Title 43 U.S.C. Section 1212, make it a crime for any person knowingly and willfully to make to any department or agency of the United States any false, fictitious or fraudulent statements or representations as to any matter within its jurisdiction.

\*\* BLM REVISED \*\*

JUN 24 2014

**Additional data for EC transaction #247697 that would not fit on the form**

**32. Additional remarks, continued**

Completion operations were performed and the pressure in the annulus between surface and production casing remained at zero psi. The annulus was pressure tested and report filed in accordance with Sundry Condition of Approval #5.

On May 29, 2014, the annulus was again pressure tested, in accordance with Condition of Approval #6 and deemed acceptable by BLM witness Ms. Hutchins. Attached please find the Ruby Federal #33 pressure chart.

Thank you for your time spent reviewing this report.
