DCP Midstream is preparing the Linam AGI facility site to drill the approved Linam AGI#2 near the P&A well described above. Because there will be traffic in that area of the site, we wish to remove the existing aboveground marker and replace it with a belowground marker. DCP has an active ROW with the SLO that includes the location of this well and all activity will be within that approved ROW. The GPS coordinates and the information shown on the marker is provided below. The new below grade marker will contain the identical information as is on the current above ground marker.
