13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Cimarex Energy respectfully requests approval to perform 1" cement job and install new 13-3/8" wellhead.

Verbally approved by Ed Fernandez 12-24-14.

Cement did not circulate to surface while cementing the 9-5/8" intermediate casing. Cimarex proposes the following cementing plan:  
1" tubing was run to TOC in the 9-5/8" X 13-3/8" annulus. Cement plugs were pumped until cement was circulated to surface.

After ND BOPs and attempting to set 9-5/8" casing slips it was discovered that the 9-5/8" casing was off center and could not be adjusted to center.

**APPROVED**

**Additional data for EC transaction #286328 that would not fit on the form**

**32. Additional remarks, continued**

Proposed plan:

Cut the 13-3/8" wellhead off, install 9-5/8" wellhead with base plate.

Weld 9-5/8" base plate to 13-3/8" casing and install nipple with valve onto the 13-3/8" casing.
