BTA Oil Producers plans to surface commingle hydrocarbon production from the following formations and wells:

French, 9004 JV-P, #2 API 30-025-31118 NM 078148 Corbin, Bone Spring, South NE/SE, Sec. 24, T18S-R32E.

A map is attached showing the location of the wells. A schematic diagram is also attached which clearly identifies all equipment that will be utilized.

The storage and measuring facility is located at SE/4, Sec. 24, T18S, R32E on lease No. NM 078148.

Each month's production will be allocated based on the average of weekly tests.

The commingling of production is in the interest of conservation and will not result in reduced royalty or improper measurement of production. The commingling is necessary for continued operation of the above Federal leases. Original commingling of these leases, as approved by the BLM, began in February, 1996.
