Plug and Abandon

Due to higher gas prices, we plan to tie this well into a central point of delivery which will also have a gas compressor located at the central point of delivery. This well has not produced since 1970. Duke, the gas purchaser has a high low volume fee and made it impossible to produce at low volumes at low gas prices. Since there are nine wells shut-in at this time, it is our intent to start testing one well at a time in January, 2006. In some wells it will be necessary to install test pumping equipment. If testing is not economical for a well, it will be recommended for P&A to the BLM. Attached is New Mexico OCD form C-136 requesting and receiving approval for the central point of delivery. If you have questions, please call me at 432-818-0122.

Attachment to Form C-136 STEVENS B-12 LEASE

RULE 403.B(2)

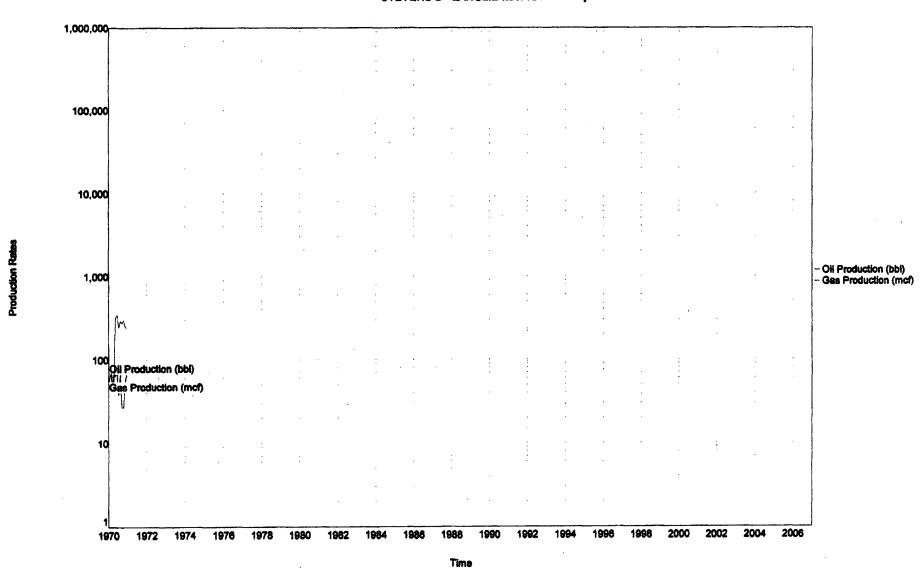

- 1. Attached as Exhibit I showing the lease as outlined in yellow and the wells to be tied into a central point delivery circled in red. The lease is N/2 of NW/4, NE/4, S/2 SW/4 of all of Sec. 12, T23S R36E, Lea County, NM and the S/2 of Section 7, T23-S R36E, Lea County, NM. All working interest and royalty interest are the same.
 - A. Wells to be metered separately.
 - 1. Stevens B No. 4 API No. 30-025-09326
 - B. Wells which will not be metered separately.
 - 1. Stevens B No. 2 API No. 30-025-09332
 - 2. Stevens B No. 6 API No. 30-025-10709
 - 3. Stevens B No. 7 API No. 30-025-09328
 - 4. Stevens B No. 9 API No. 30-025-09330
 - 5. Stevens B No. 10 API No. 30-025-09931
 - 6. Stevens B No. 11 API No. 30-025-10661
 - 7. Stevens B No. 17 API No. 30-025-21921
 - 8. Stevens B No. 18 API No. 30-025-22073
- 2. Allocating production will be based on quarterly well tests by shutting in a well and using the subtraction method or by installing a loop in the flow line and installing a vane type gas meter to test.
- 3. See attached 10 years curves for all wells. Note some wells have not produced in 10 years. It should be noted that all wells are very marginal and as such Duke Energy deducts \$600.00/month for a low volume fee. It is our intention to add the wells one at a time and use a centrally located compressor to increase volume. If this is not approved it will be necessary to P&A these wells. John H. Hendrix Corporation believes these wells have economic potential.
- 4. The gas transporter connected to this CPD is Duke Energy Field Service, L.P.

Your favorable response is appreciated due to the large number of wells planned for this CPD, it is planned to add one or two wells at a time. It will probably be necessary to install down hole pumping equipment on some of the wells. This lease does not have electricity, but at the central battery where the CPD is to be located.
