13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

**Amend Surface Location; Amend 8 5/8" Intermediate Casing Depth**

BOLD ENERGY, LP proposes the following changes to this well's drilling program:

1. Amend Surface location to: 1955' FSL & 1980' FWL of Section 36 – T9S – R32E. (The location and pits were built to specifications required for Nabors Rig #142 and operational circumstances resulted in Patterson Rig #144 being contracted for this project; movement of the surface location is necessary to accommodate changes in location specs.
2. Set 8 5/8" 32# J-55 STC casing @ 3550' rather than the currently approved depth of 3650'; further review of area geology indicates that the San Adres will be encountered at 3490' and the objective was to set this intermediate string into the top of this formation. The cementing plan will remain the same and that is to circulate cement to the surface.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines ☒, a general permit ☐ or an (attached) alternative OCD-approved plan ☐.
