New Mexico State No. 25  
L-29-22S-37E

RECEIVED

API # 30-025-10515-00-00

Attached please find sundry notice for work performed in February 2005 by GP II Energy Inc., 113 Corporate Dr. Midland TX, 79705, who is the current operator of the referenced well. This work was an attempt to P&A which was unsuccessful due to not being able to engage the 2 7/8" casing which was parted and the top is at a depth of 376'. Upon completion of this work 10 joints of 2 7/8" casing and 2 joints of 1.90" tubing were put back in the well. The well was then shut in. An MIT was inadvertently scheduled and witnessed by the OCD on 7/29/2015. The MIT failed and the well is noncompliant.

Enclosed is form C103 Sundry notice of intent to begin plugging operations, a wellbore diagram, and the above mentioned C103 for the work previously completed. The work related to the C103 notice of intent will begin on or before the Corrective Action Due Date of 11/1/2015. If you have questions or need additional information regarding plan of action for the referenced well please feel free to contact me.
