13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Devon Energy respectfully requests approval of a battery change from the original Interim Reclamation Diagram in the approved APD for the Thistle Unit 52H.

Originally the APD stated the battery for this well would be located at the Central Tank Battery in Section 22, Township 23S, Range 33E. However, because that battery could not handle the amount of production coming to it from the Thistle wells, a second battery was constructed on the Thistle Unit #52H pad to handle half of those wells.

The wells currently routed or planned to be routed to the Sec 28 Battery in the near future are: Thistle Unit 51H, 52H, 53H, 59H, 60H, and 54H.

14. I hereby certify that the foregoing is true and correct.

**Additional data for EC transaction #321814 that would not fit on the form**

**32. Additional remarks, continued**

Since there is now a battery on location, downsize reclamation was not possible (please see diagram attached). Thank you.
