13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

On December 15, 2015, notification was given to Paul Kautz, NMOCD by Ryan Epperson, Completions Engineer, Devon Energy that the Taipan 10 State Com 8H was found to have a top of cement on the production casing string of 6,535' via CBL. The COA for the well required the production casing cement to tie back to the intermediate casing string, which is set at 5,202'. In lieu of remediation of the low TOC, Devon Energy will monitor the intermediate casing string and proceed forward with the frac job.

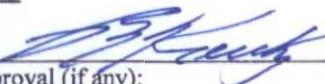

A copy of the CBL has been submitted to the NMOCD.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
