13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

MOC has an approved APD for the subject well. MOC would like to make changes to the site facility and interim reclamation area. MOC would like to install a facility on this well site, this will change the area to be reclaimed due to needing more room for tank battery, separators, etc. MOC also has a well staked 120' east of the subject well, this will affect the interim reclamation as well. Please see new facility diagram attached & call Bradley Bishop with any questions.

14. I hereby certify that the foregoing is true and correct.

Electronic Submission #253497 verified by the BLM Well Information System
