13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

The gas purchaser for this well has abandoned a portion of their gathering system, including the current meter run for the POCO LOCO FEDERAL NO. 1. We plan to lay a new flowline to a new location approximately 2 miles away to deliver gas to the purchaser's system, however we will be required to acquire a right-of-way on federal property to accomplish this. This will inherently require some measure of time..

We hereby request a shut-in status for six months to allow Hunt Cimarron the time to obtain the necessary right-of-way and install the flowline in order to restore gas deliveries and sales.

*Rejected - submit sundry to (TA) temporary Abandonment.
This would require a casing test and isolating production interval w/ CIBP + 25 SX cement*
