prior of running MIT Test & Chart

Run MI test to gain extension on temporary abandoned well.

Due to recent ROZ development in the South Hobbs Unit, it is requested that the Byers A31 be granted a TA extension barring a successful MIT. The Byers A31 is a deep well that penetrates through the entire ROZ. ROZ drilling will commence in the South Hobbs Unit in Q2 of 2016. This 4-pattern project will help bring an understanding of the ROZ, and if the project is successful the ROZ development could be extended field wide. The wellbore configuration of the Byers A31 make it a great candidate to be used in this project expansion.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-grade tank has been/will be constructed or

closed according to NMOCD guidelines ☐ , a general permit ☐ or an (attached) alternative OCD-approved plan ☐
