13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

CSAU026

NOTE: This work has been partially completed - see below. Per OCD request, initially remove from well pad only: asphaltene waste, regardless of condition; all stained soil and all soil above OCD criteria. If waste transport via watercourse (e.g., gully) is evident, removal and sampling will extend off well pad into watercourse. OCD post-excavation soil criteria shall be 250 mg/Kg chloride and background for benzene and TPH. Use backhoe to remove soil surrounding well pipe, regardless of depth. Sample soil for analytes above. Haul waste to lined, bermed staging area in Cano-owned surface of NW/4 10-8S-30E of Cato unit pending disposal arrangements.

If needed, shut in well, move pumping unit/base and remove soil beneath.

This work has been partially completed: Cano removed 1 cubic yards soil and hauled to staging area on 2/11/2010. Excavation will proceed no further without BLM written authorization. Upon authorization, Cano expects to remove additional soil, proceed with waste management, testing, OCD submittal, concurrence and backfill as described here.

When final removal is complete, Cano will complete OCD Verification of Corrective Action Sheet-VCA (3-09-10), submit to OCD, await concurrence. Upon concurrence, emplace new fill, surface with caliche, replace base and pumping unit, and put well back on line. Complete subsequent, final BLM Sundry notice. BLM Modify to: Upon BLM's authorization, Cano will proceed with i) removal of remaining waste outside of well pad area, additional archaeological survey may be necessary, contact BLM archaeologist Rebecca Hill at 575-627-0218 ii) waste management, iii) testing of soils where waste has been removed from outside the well pad area iv) and backfill excavated areas.
