13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

EOG Resources requests permission to run 2 flowlines and 2 gas lift lines from our 4 well pad (Thor 21 Fed Com 703H/704H & 707H/708H) to the Thor CTB on private surface. This will require a 30' easement on BLM surface as depicted on the attached plats.

Bob Ballard - BLM Natural Resource Specialist is aware of, and approves this plan.

OK Per Bob Ballard 3-9-2016

14. I hereby certify that the foregoing is true and correct.

Stan,

I need to get a sundry out asap for the Thor 703/704 and 707/708. Basically we are going to build the facility for these wells on the north part of the existing Thor CTB pad that is on private surface. We will run two flowlines and two gas lift lines from the four well pad up to the CTB. It will be a 30 foot row. The row on BLM surface is on lease and routing does not change from original APD. The rest of it is on private surface that does not pertain to the BLM. Please note that Bob Ballard knows of the plans we are doing for this facility and has already verbally approved this. They just need this sundry for their records. Call me if you have questions.

James
