13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

CHEVRON MIDCONTINENT LP HAS PLUGGED THE ABOVE WELL ON 03/01/2010. CHEVRON WILL CONDUCT THE RECLAMATIO. PLEASE SEE ATTACHED PROCEDURE.

**Required:
Submit haul ticket for
contaminated materials.**

Federal 17 #1 and Federal 17 A #2 Site Remediation – Spill Site Clean Up

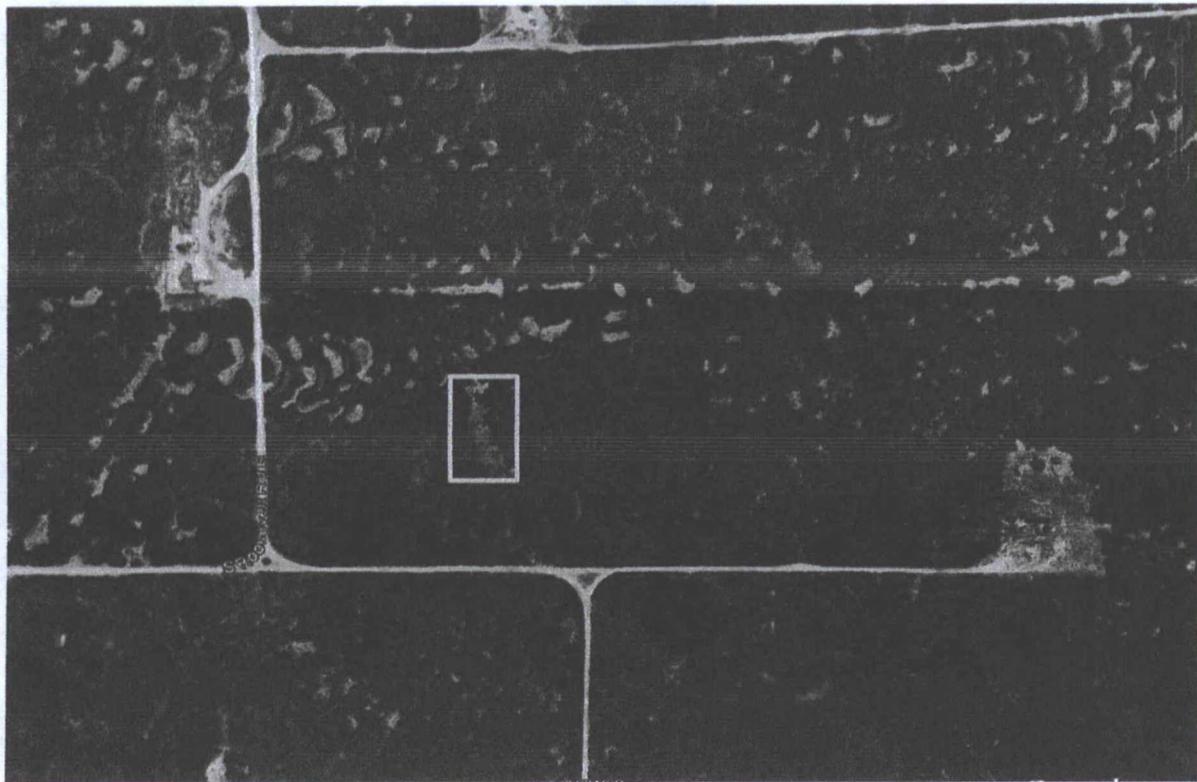

In the process of scoping the reclamations of the Federal 17 #1 and Federal 17 A #2, Chevron noticed a leak area along the nearby flow line associated with Federal 20 #1. This leak appears to be a historic leak, encompassing an area that is 232 feet long at the longest point and 65 feet wide at the widest point. After meeting with both the BLM and NM Game and Fish on location and inspecting the leak site, it was determined that Chevron would clean up the leak site and return the site to its natural state.

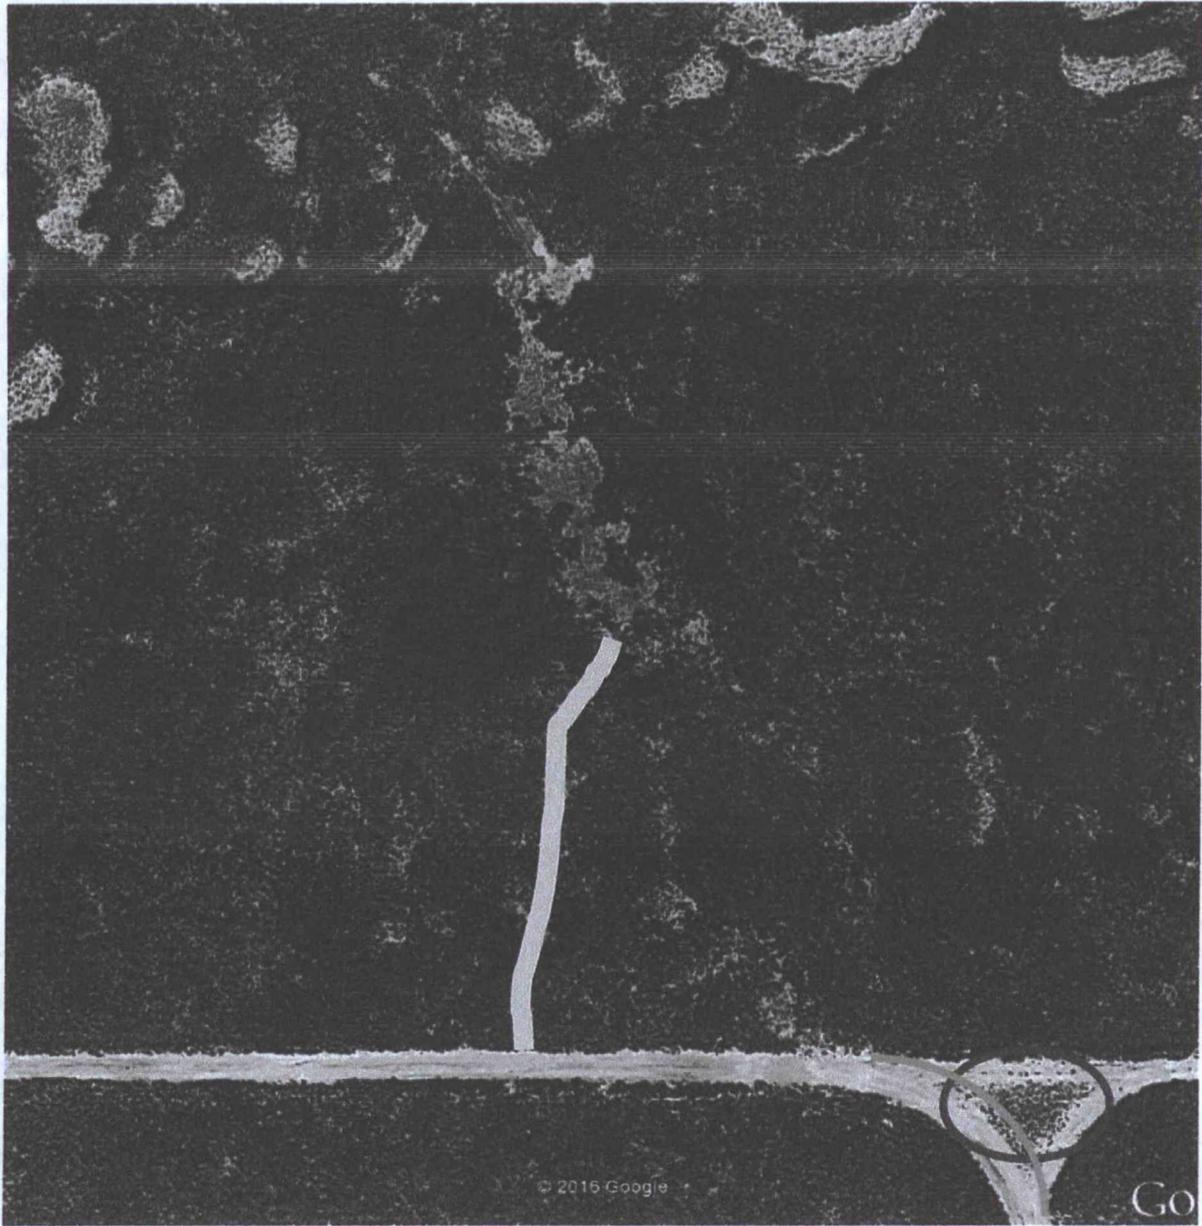

Chevron will create a single inlet/outlet path to the leak area and a staging area for loading. The spill area will be dug down approximately 2 feet and the dig perimeter will be contoured. The existing vegetation within the spill area will be excavated around as to minimize the impact to active plant growth. Once the contaminated soil has been removed, BLM seed mix #2 will be applied in the spill area, and the staging area will be cleaned and seeded as well. The road leading to Federal 17 A #2 will be excavated along the tracks. A ditch and berm will be created as to deter access where the road curves at the fork. The projected start date for this project is July 16th 2016.

Yellow: Spill Area (~11,650 ft²)

GPS Coordinates of Leak Site: 33.616863, -103.069734

Yellow: Path in/out

Red: Staging area to be excavated to deter access to Federal 17 #2 A upon completion

Blue: Ditch and Berm
