Run MI test to gain extension on temporary abandoned well.

Due to recent ROZ and CO2 development, the Hobbs field has a surplus of water. The Hobbs' team is currently working up possible solutions to this issue. The SHU 91 would make for a great swing injector to help alleviate this surplus of water production if other solutions are not discovered. Would like to keep this well available for possible RTI work.

Condition of Approval: notify

OCD Hobbs office 24 hours

prior of running MIT Test & Chart
