13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

ConocoPhillips Company respectfully requests to expand the existing Wilder Pit located in the NENE of Section 28, T26S, R32E, Lea County, NM; as the pit itself currently does not have the capacity to frac COP's nearby wells.

The expansion will shift the east side of the pit approximately 40' to the east on to the existing Wilder 28 Federal 001H well pad (as shown in the attached aerial). This surface is already disturbed, thus, there will be no additional surface disturbance.

This expansion will also be just long enough to not interfere with potential traffic coming onto the well pad.

We plan to frac wells on a nearby lease early 2017, so we would greatly appreciate quick approval
