13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

McElvain Energy Inc. (MEI) respectfully requests permission to install ~6200' of SDR 7 poly line to gather the natural gas from 5 vertical wells all residing on BLM Lease #245247, and route the gas to the McElvain #4 well pad for enclosed combustion. This request is necessary because the gas transporter, Frontier Field Services, has recently denied McElvain access to the pipeline on six wells (McElvain #4, #5, #6, #7, & #9) due to high nitrogen levels (> 4%) present in the gas stream. The high nitrogen levels render the gas non-marketable. MEI has been working with Frontier on a solution so that gas sales can be resumed. However, no workable solution has been identified at this time.

The gathering line will be above ground except where the line crosses the lease Road where we will bury it.

Due to the low volume of gas produced from these older vertical wells, McElvain would like permission to transport the gas from the McElvain #4, #5, #6, #7, and #9, to an enclosed combustor at the McElvain #4. The combustion portion of the project has already been approved by the BLM
