13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Chevron Midcontinent, L.P., as Operator of the Lovington Paddock Unit (LPU) and Lovington San Andres Unit (LSAU), respectfully requests administrative approval to surface commingle gas production from the LPU and LSAU in Lea County, New Mexico.

The proposed commingling will not affect royalty value of gas. Two allocation meters will be installed at the existing central tank battery for the LPU and LSAU. Gas production will be allocated to each unit with continuous measurement by the allocation meters. A single compressor will be installed downstream of the allocation meters and a single sales meter will be installed downstream of the compressor. Each units share of gas will be calculated based on the results of continuous measurement.

Chevron Midcontinent, L.P. – Lovington Paddock Unit & Lovington San Andres Unit

APPLICATION FOR COMMINGLING AT A COMMON CENTRAL DELIVERY POINT

Proposal for Lovington Paddock Unit (LPU) and Lovington San Andres Unit (LSAU):

Chevron Midcontinent, L.P. is requesting approval for the Commingling of gas:

Lovington Paddock Unit (Glorieta Paddock Reservoir)							
Well Names	Locations	API Numbers	Pool 40660	Oil BOPD	Oil Gravity	Gas MCFPD	Gas BTU
See Attachment II pages 19-20	See page 21	See Attachment II pages 19-20	Lovington; Paddock	N/A	N/A	40	1543

Lovington San Andres Unit (San Andres Reservoir)							
Well Name	Locations	API Numbers	Pool 40580	Oil BOPD	Oil Gravity	Gas MCFPD	Gas BTU
See Attachment III page 22	See Page 23	See Attachment III page 22	Lovington; Grayburg- San Andres	N/A	N/A	29	1460

The LPU contains one (1) Federal Lease (NMLC0058418) containing 49.68 acres, which equates to 1.49% of the total Unit area (3324.63 acres).

The LSAU contains one (1) Federal Lease (NMLC0058418) containing 49.68 acres, which equates to 2.0115% of the total Unit area (2469.81 acres).

Oil & Gas metering:

There will be no oil commingling between the LPU and LSAU. Each unit's oil will be stored and sold separately at the LPU/LSAU Central Tank Battery (CTB) located at NW/NE Sec 1, T17S, R36E in Lea County, New Mexico. For gas, there is a common central delivery point (CDP) gas sales meter (S/N*) located at the CTB (NW/NE Sec 1, T17S, R36E).

For each Unit train, gas production will be allocated on a daily basis based by continuous measurement of the combined gas from the three-phase production separator, polishing vessel, and vapor recovery unit equipped with Totalflow orifice plate meters (S/N 30750-00 and 30751-00). The sum production will be applied to the total gas metered by the DCP CDP sales meter (S/N*) on the west side of the CTB.

The LPU gas allocation meter on the LPU train consists of a Totalflow orifice plate meter (S/N 30751-00)

The LSAU gas allocation meter on the LSAU train consists of a Totalflow orifice plate meter (S/N 30750-00).

There will be no oil commingling at this CTB.

All metering serial numbers (S/N*) will be provided prior to gas production commingling from these units.

Process and Flow Descriptions:

The flow of production is shown in detail on the enclosed facility diagrams and maps, which show the Unit boundaries, location of wells within the Units, CTB location, allocation meters and gas sales meter. The commingling of this production is the most effective economical means of production and will not result in reduced royalty or improper measurement of production.

Chevron Midcontinent, L.P. understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument.

**APPLICATION FOR SURFACE COMMINGLING FOR GAS PRODUCTION ONLY FOR
THE LOVINGTON PADDOCK UNIT AND LOVINGTON SAN ANDRES UNIT, LEA
COUNTY, NEW MEXICO (OLS-819905 & 820033)**

Dear Sirs,

Chevron Midcontinent, L.P. as Operator of the Lovington Paddock Unit (LPU) and the Lovington San Andres Unit (LSAU) is hereby proposing the surface commingling for the **Gas Production Only** from the LPU & LSAU in Lea County, New Mexico.

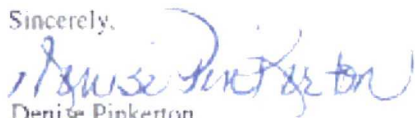

Two (2) allocation meters will be installed at the existing battery location for each Unit, one for the LPU and one for the LSAU. A single compressor will be installed that will commingle the gas downstream of the meters. A single sales meter will be installed that will eliminate the extra sales line. The allocation of production and revenue will be based on the volumes of gas production from all the wells in each Unit as measured through the two allocation meters.

As agreed upon by both NMOCD and BLM, royalty interest owners have been notified by publication of notice in the Hobbs News Sun Newspaper, copy attached, issue date of August 07, 2015.

Please find attached, supporting documents for this proposed surface commingle, including list of all wells in the units, API numbers, schematics of facilities, and list of unit owners and working interest percentages.

State Land Office and BLM have both been notified with this same information.

Sincerely,

Denise Pinkerton
Regulatory Specialist

LEGAL NOTICE
August 7, 2015

NOTICE is hereby given that Chevron Midcontinent, L.P., 15 Smith Road, Midland, Texas 79705, as Operator of the Lovington Paddock Unit (LPU) and the Lovington San Andres Unit (LSAU) in Lea County, New Mexico has filed an Application with the New Mexico Oil Conservation Division for approval for the Surface Commingling of the gas production only. The proposed surface commingling will entail the installation of two abstraction meters at the existing battery locations for each Unit, a single compressor and installation of a single sales meter to eliminate the extra sales line. The purpose is to reduce the surface facility footprint and improve the operation of the mature Units. The batteries for both the LPU and LSAU are located in the NE¼ of Section 1, T-17-S, R-36-E. The land description for the two Units is as follows:

**RE: NOTICE OF PROPOSED SURFACE COMMINGLING FOR GAS
PRODUCTION ONLY FOR THE LOVINGTON PADDOCK UNIT &
LOVINGTON SAN ANDRES UNIT, LEA COUNTY, NEW MEXICO (QLS-
819905 & 820033)**

Dear Working Interest Owner:

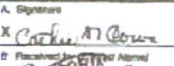

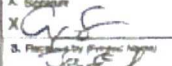

Chevron Midcontinent, L.P. (Chevron) as Operator of the Lovington Paddock Unit (LPU) and the Lovington San Andres Unit (LSAU) is hereby proposing the surface commingling for the **Gas Production Only** from the LPU & LSAU in Lea County, New Mexico. The plan for the surface commingling for the LPU & LSAU will be as follows:

1. Two (2) allocation meters will be installed at the existing battery location for each Unit, one for the LPU and one for the LSAU;
2. A single compressor will be installed that will commingle the gas downstream of the meters;
3. A single sales meter will be installed that will eliminate the extra sales line; and
4. The allocation of production & revenue will be based on the volumes of gas production from all the wells in each Unit as measured through the two allocation meters.

An AFE for the facility upgrades for the surface commingling will follow by separate package once we have approval. I have attached Figure 2 – New Design and Layout as well as a Map showing the two overlapping Units and the location for the surface commingling for your convenience.

Chevron requests your acknowledgement, confirmation and approval at your earliest convenience upon receipt of this letter by signing in the space provided below and returning a signed copy to me

Condition of Approval
Surface commingling of Unit gas**

1. This approval is subject to like approval by the New Mexico Oil Conservation Division.
2. This agency shall be notified of any spill or discharge as required by NTL-3A.
3. This agency reserves the right to modify or rescind approval whenever it determines continued use of the approved method may adversely affect the surface or subsurface environments or product accountability.
4. This approval does not constitute right-of-way approval for any off-lease activities. Within 30 days, an application for right-of-way approval must be submitted to the Realty Section if not already done.
5. Approval for combining production from various sources is a privilege which is granted to lessees for the purpose of aiding conservation and extending the economic life of leases. Applicants should be cognizant that failure to operate in accordance with the provisions outlined in the Authorized Officer's conditions of approval and/or subsequent stipulations or modifications will subject such approval to revocation.
6. Gas measurement for allocation must be measured as per Federal Regulations, AGA and API requirements for sales meters.
7. All gas and oil subject to royalty shall be measured as per federal regulations and shall be reported to ONRR as required. All gas which is vented, flared or used on lease shall be reported as per NTL-4A to ONRR. All gas which is vented or flared shall be subject to royalty, unless prior approval was given by the authorized officer.
8. This agency shall be notified of any change in sales method or location of sales point.
9. Additional wells and/or leases require additional commingling approvals.
10. Notify this office 24 Hrs. prior to any meter calibrations to allow time for an inspector to witness.

The approval of this commingling is as per Category I of IM NMPO-2013-02. These Two Unit are API/Unit and contain less than 10% Federal interest. Wells within these units are not listed in AFMSS and are not maintained in BLMs data base. Almost all production for the units are reported to only one well to ONRR for royalty purposes. BLM has only one lease on these units. Federal Lease NMLC058418, which consist of 49.680 acres. Unit NMNM 70980X consist of 3,324.630 acres and NMNM70981X consist of 2,469.910 acres. By combining the gas production, the royalty value will not be affected due to all the production being of the same value. This does not mean that the allocation of production to each unit will be 100% accurate each month. By approving this request, it will only guarantee that the public's interest will not be compromised.
