13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Devon Energy Production Co., L.P. respectfully requests approval to change the access road. The proposed access road includes a temporary road going around the Blue Krait 23 Fed 3H / 4H / 6H pad. The currently approved road passes through the Blue Krait 23 Fed 3H / 4H / 6H pad. This would be a safety issue during drilling process as traffic would have to drive through the pad to access the CTB to the west. The proposed temporary road that wraps around the pad would resolve the safety issue.

Please see attached revised plats for CTB and CTB access road.
