**RECEIVED**

Subject: New Mexico A #2 30-025-01269

George Kenemore,  
Upon reviewing the wellbore diagram submitted with the C-103 subsequent for work recently performed on the New Mexico A #2, I find that new perforations are shown outside of the approved SWD-1088 order. The order approved injection from 10,839'-11,556'. Listed on the wellbore diagram are "new perfs" as of 5-17-2017 **10,813'-10,838' and 11,572'-11,578' 64 holes.** Along with other perforations starting 11,593'-12,130', 112 holes. **As of 8/7/2017 please shut in and cease injection** into this well. Please provide information on the perforations you have shown as "new" to Phillip Goetz, Santa Fe OCD, 505-476-3466. Since these perforations are outside the approved interval a re-application maybe required. The well is to remain shut in till OCD District I receives approval from Santa Fe to resume injection. I will be sending out email to your address as listed stating the same.

Sincerely,

Maxey G. Brown  
District I AO/II
