Inflowing completion of the involved operations. It fle operation results in a multiple completion or recompletion in a new interval of fled once testing has been completed. Final Abandonnent Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the sits is ready for final inspection. We are studying the loss of injection in the area to determine the sits is ready for final inspection. We are requesting the TA status be extended for 1 year to allow us to study the reservoir response before returning the well to injection. We are studying the loss of injection in the area to determine the effect it will have in the ultimate recovery of the unit.  Last report of injection the month of 12/2013.  TA expired of 4-1/4/2017.  Submit plugging procedure or return well to "benificial use"  The recovery of the unit.  List report of injection in the original inspection of the plugging procedure or return well to "benificial" use"  The Popularity of the Hobbs of the plugging procedure or return well to "benificial" use"  The Described Provided By Described Described By the BLM Well Information System Committed to AFMSS for processing by DEBORAH MCKINNEY on any Alphan Planta Described	303 W.WALL ST. 13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandoment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.  PROCEDURE: Perform and record MIT test. Submit chart to Midland for filing.  REASON: We are requesting the TA status be extended for 1 year to allow us to study the reservoir response before returning the well to injection. We are studying the loss of injection in the area to determine the effect it will have in the ultimate recovery of the unit.  Last report of injection the month of 12/20/3.  TA expired 04/14/20/7;  Submit plugging procedure or return well to "benificial use"  14. I hereby certify that the foregoing is true and correct.
