

# **WELL INFORMATION**

**HOBBS OCD**

**NOV 02 2017**

**RECEIVED**

**Rebel Federal 20 #6**

**30-025-42995**

When drilling the conductor for the Rebel 20 Fed 6H original SHL, the auger unit drilling the mouse hole collided with the conductor putting a 20" hole in the conductor which more than likely parted the conductor. Ready Drill, the conductor/mouse hole company, plugged the entire conductor and mouse hole along with the cellar with cement programed in the above table.

Well was skid and repermited under API
