13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Following the frac job we made our second attempt to establish injection down the 5-1/2" x 9-5/8" casing. We tied into the 5-1/2" x 9-5/8" annulus and pressured up to 1000 psi. Pressure bled of 100 psi in 30 min. Attached is the test chart. Since we were unable to establish injection we would like to go ahead and put the well on production. We will monitor the 5-1/2" x 9-5/8" annulus for the life of the well via SCADA with alarms set.

14. I hereby certify that the foregoing is true and correct.
