13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

JR Oil LTD Co. respectfully requests approval to Surface Commingle gas production from the wells listed on the attachment and is authorized by the surface commingling order CTB-842 (attached). Production has declined to a point where the gas purchaser charges a low volume fee on the individual meters; combining the gas production will allow JR Oil to economically produce these wells. Oil production will continue to be produced and measured separately. Therefore, we request approval of gas production at a central sales meter located at the Eaton SW Well No. 4 well.
