13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Fasken has had this well TA'd back on 12/14/16, and we received a TA approval until 2/1/18, where at that point we needed to submit a sundry to P&A or return the well to beneficial use. We are requesting an extension for the TA. We would like to eventually recompleat the well to the Delaware or Queen formation, but where gas prices are at right now, it is uneconomical. We also could convert the well to an SWD, but until there is horizontal drilling in the area, it makes this option uneconomical right now as well. Please find attached an MIT test we ran on 1/30/18.

**RECEIVED**

*TA good for 1 year ending 1/29/19. At that time either plug or produce. Gas prices should not be a factor in returning oil well to prod.*

14. I hereby certify that the foregoing is true and correct.
