13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Due to an Enterprise pipeline ROW cutting through our original well pad. The pad and SHLs had to move to get out of the way of the existing pipeline. The pad itself moved about 155 feet east and then rotated 90 degrees. This also made the two SHLs sit north and south of each other.

The pad size is a little bigger than before:  
Original size 450x340  
New size 453x400

The SHL have changed due to the pad move:  
Original SHL 701/702 east and west, separated by 30 feet Eng Okay CRW 2/15/19  
New SHL 701/702 north and south, separated by 33 feet

**32. Additional remarks, continued**

The road and flow line route also changed slightly at the well pad:  
Access road and flow line running north and south into pad moved west about 50 feet.

Plats and sketches of the changes are attached to sundry.  
This has been previously covered within the boundaries of arch and EA survey coverage. We request  
this be approved through a CAD-X.

Topsoll is not being included due to lack of space with the pipeline ROW constraints.
