13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

?EOG Resources requests a change to the pad dimensions and access road due to a pipeline from another operator overlapping our original approved location. If we flip the 250 side of the pad from south to north this will get us out of the pipeline ROW. With the 250 side flipped to the north the road will need to be enter in on the northwest side of pad. Please see attached diagram for visual detail. Shape files have been submitted for this project.?
