13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Ameredev would like to widen the road leading into the NAN/GB #1N location from the approved 14' to 20' to allow for two way traffic. We are going to have multiple drilling rigs and multiple completion crews in this area which will create congestion and safety issues if we are limited to 14' roads. The road will be reclaimed back to 14' after the wells in this area have been completed.
