Additional Comments:		
Closure work plan for drilling pit. Category 1 location: The drilling pit contents will be excavated & hauled to an NMOCD approved soil waste facility		
If there is evidence of contamination, the soil will be tested by lab and if contamination is confirmed, further remediation will be conducted according to guidelines.		
The excavated area will be backfilled with clean soil and covered and contoured with three feet of soil or like material capable of supporting native plant growth to prevent		
erosion and ponding of rainwater.		
A one call and a 48 hour notice will be provided to the Oil Conservation Division.		
I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that the above-described pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines , a general permit X or an (attached) alternative OCD-approved plan .		
Date: _02-01-06Printed Name/TitleBob Allen/ Consultant Signature		
Your certification and NMOCD approval of this application/closure does not relieve the operator of liability should the contents of the pit or tank contaminate ground water or otherwise endanger public health or the environment. Nor does it relieve the operator of its responsibility for compliance with any other federal, state, or local laws and/or regulations.
