Donna here is the Landmans answer, so it was a one well farmout nd borehole assignment so we are operator of future wells in spacing and Federal unit. Let me know if you need anything further.

Thanks

Zeno

Zeno, the Farmout/Assignment was limited to the WELLBORE only. We checked with Jim Bruce (after sending him copies of the Farmout and Assignment) and he agreed that we had the right to propose and drill it. don

Don the OCD is asking about the Maduro Unit 8 occupying the same W/2 spacing as the Nearburg operated Maduro Unit # 5. I told them that Tom Brown must have given them a one well farmout as we operate the unit but that I would check with our Landman. Do you know if that was the case?

Thanks
