13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-5 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

ConocoPhillips propose a VARIANCE to Onshore Order No. 2 in order to allow testing our BOPs as follows:

Test Pipe Rams and Blind Rams to 3000 psi instead of 5000 psi

Test Annular BOP to 2000 psi instead of 2500 psi

The reason for this request is that we feel this is an adequate test and reduces wear and tear on the equipment.

We propose a VARIANCE to Order # 2 to allow pressure testing the Surface Casing to 1000 psi instead of to 1500 psi. Per Onshore Order # 2 the test would be performed for a minimum of 30 minutes with less than 10% pressure decline in the 30 minute test period. The reason for this is that we feel this is an adequate test pressure and will allow the use of the rig pump for the test instead of a testing unit pump and will reduce wear and tear on the equipment.
