Additional Comments:
Devon Energy Production Company L.P. plans to close the drilling pit on the Paloma Blanco 17 Fed Com #2 as per New Mexico Oil Conservation Division rule 50 in the Pit and Below Grade Tank Guidelines. Devon had planned to encapsulate this pit, but decided the pit area was too shallow to encapsulate. We would like to trench bury the pit liner & contents. We will line the trench with 12 mil liner, bury contents and liner, then cover with 20 mil plastic, then cover with 3' of native material capable of supporting native plant growth.
We will contour the pit area to prevent erosion and ponding of rainwater. We will notify the OCD 48 hours prior to beginning work.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that the above-described pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines ☒, a general permit ☐, or an (attached) alternative OCD-approved plan ☐.
