13. Describe Proposed or Completed Operation (clearly state all pertinent details, included estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Lay approximately 800' of 3" SDR-7 polyline down previously arced cleared access road from our Pipeline B 5 No. 2 Bone Spring well in the NE/4SW/4 of 5-19S-34E to our recently completed Bone Spring producer the Pipeline Deep Federal Com 5 No. 1 in the SE/4SW/4 of 5-19S-34E. Bone Spring production from both wells will be commingled in a common battery and production will be allocated based on periodic well tests. Ownership in both wells is common.

The line will be layed on the surface to minimize disturbance and will have a working pressure of 30 to 60 psi. This flowline is in accordance with our previously approve POD for Bone Spring development.
