If this is a pit closure: (1) Attach a diagram of the facility showing the pit's relationship to other equipment and tanks. (2) Indicate disposal location: (check the onsite box if		
your are burying in place) onsite X offsite 🔲 If offsite, name of facility (3) Attach a general description of remedial action taken including remediation		
start date and end date. (4) Groundwater encountered: No X Yes 🔲 If yes, show depth below ground surface ft. and attach sample results.		
(5) Attach soil sample results and a diagram of sample locations and excavations.		
Additional Comments: Closure work plan for drilling pit. Category 2 location: The drilling pit contents will be excavated from the pit area.		
If there is evidence of contamination, the soil will be tested by lab and if contamination is confirmed, further remediation will be conducted according to guidelines. A trench		
will be installed. The trench will be lined with a 20-mil impervious liner and the excavated material will be placed on top and encapsulated.		
The excavated pit will be backfilled with clean soil and the pit area as well as the trench will be covered and contoured with three feet of soil or like material capable of		
supporting native plant growth to prevent erosion and ponding of rainwater.		
A one call and a 48 hour notice will be provided to the Oil Conservation Division.		
I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that the above-described pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines . , a general permit X or an (attached) alternative OGD approved plan .
