The foregoing was done in anticipation of conducting a tertiary (CO2) recovery program in which this well would potentially be used as either an injection well or producing oil well. Given the scarcity of CO2 at this time, our plans have been delayed until such time as an adequate supply of CO2 is secured. Accordingly, Pogo requests that such well be allowed to remain in a TA'd status, with the understanding that it will conduct a mechanical integrity test in such well within the next few days.
