13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The Cotton Draw Unit #75 was a TA'd well when Pogo purchased the lease and took over operations in August 2005. In March 2007, Pogo drilled out the CIBP @ 4635' and attempted to return the well to production. Swab test results indicated the well capable of producing 40 to 50 bbls of water per hour with no oil or gas. A CIBP was reset at 4635' and the well was circulated with packer fluid. The casing and CIBP were tested to 500# for 30 minutes. The test was witnessed by BLM representative Jim McCormick. The well was again TA'd and remains on the NMOCD inactive well list.
