13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No on file with BLM/BIA. Required subsequent reports shall be file within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Status update on TA well.

We wish to continue TA status to preserve this well bore for future EOR use

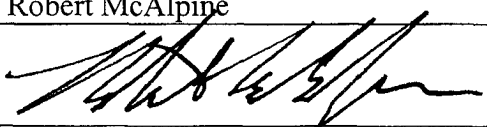

Well passed MIT on, 11-21-06, original chart was submitted

Well is scheduled for OCD bradenhead test on 6-13-2007

**SUBJECT TO LIKE
APPROVAL BY STATE**

Wellbore Configuration: Casing: 4-1/2" @ 4775' APPROVED FOR 12 MONTH PERIOD
Perfs: 4666-4740
CIBP: 4610' ENDING 7/6/2008

14. I hereby certify that the foregoing is true and correct

North El Mar Unit
Temporarily Abandoned Wells
Status Update
June 25, 2007

It is requested that Temporarily Abandoned status be continued for the temporarily abandoned wells in the North El Mar Unit, Lea County, New Mexico. Please refer to the Justification For Request For Temporarily Abandoned Status for these wells dated July, 2006.

The North El Mar Unit project keys off the nearby Cotton Draw Unit, Paduca Delaware Sand Unit CO₂ project, which has received regulatory approval, but has yet to be implemented due to a lack of CO₂ supply. We have remained in touch with POGO Producing Company regarding their progress at obtaining a CO₂ supply. Their negotiations continue and they hope to obtain a supply soon, but since all current supply is presently called for, they may be forced to wait for expansion of supply from Kinder-Morgan's McElmo Dome project. This could hopefully occur in 2008.

In the meantime, Sahara continues to try and repair these TA wells when they suffer from casing problems. We have recently completed repairs on wells NEMU #18 and NEMU #28. Both of these wells were successfully repaired.

It is considerably more costly to Sahara to repair rather than plug these wells; however, we consider preservation of these wellbores for future use to be critical to the viability of a CO₂ project in this field. Once a well has been plugged and abandoned, successful re-entry is by no means assured. While they are currently a financial and regulatory burden, we are convinced of the future need for these wells and believe that, were they to be P&A'd, the prospects for implementing a future CO₂ project would be severely impaired.

Sahara will file another status update on or before September 30th, 2007
