13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

1. Planned to repair csg leak, but based on the lack of offset producing wells, returning this well back to injection will not serve a purpose at this time.

2. Due to Casing Integrity issues, the economic feasibility to reactivate this well needs to be taken under close consideration, therefore XTO would like to request permission to TA this well for future evaluation.

3. Will plan to RTWI upon evaluation.
