For downstream facilities, submit to Santa Fe office

Pit or Below-Grade Tank Registration or Closure

Is pit or below-grade tank covered by a "general plan"? Yes ☐ No ☒

Type of action: Registration of a pit or below-grade tank ☐ Closure of a pit or below-grade tank ☒

Operator: COG Operating LLC Telephone: 432-685-4340 e-mail address: pedwards@conchoresources.com	
Address: Fasken Center Tower II, 550 W. Texas Ave., Suite 1300, Midland, TX 79701	
Facility or well name: West Pearl "36" State #1	API #: 30-025-38079 U/L or Qtr/Qtr: F Sec: 36 T: 19S R: 34E
County: Lea	Latitude: N 32° 37' 07" Longitude: W 103° 31' 00" NAD: 1927 ☐ 1983 ☐
Surface Owner: Federal ☐ State ☒ Private ☐ Indian ☐	
Pit Type: Drilling ☒ Production ☐ Disposal ☐ Workover ☐ Emergency ☐ Lined ☒ Unlined ☐ Liner type: Synthetic ☒ Thickness 12 mil Clay ☐ Pit Volume: 30,000 bbl	Below-grade tank Volume: _____ bbl Type of fluid: _____ Construction material: _____ Double-walled, with leak detection? Yes ☐ If not, explain why not: _____
Depth to ground water (vertical distance from bottom of pit to seasonal high water elevation of ground water.) greater than 100 feet	Less than 50 feet (20 points) 50 feet or more, but less than 100 feet (10 points) 100 feet or more (0 points)
Wellhead protection area: (Less than 200 feet from a private domestic water source, or less than 1000 feet from all other water sources.)	Yes (20 points) No- X (0 points)
Distance to surface water. (horizontal distance to all wetlands, playas, irrigation canals, ditches, and perennial and ephemeral watercourses)	Less than 200 feet (20 points) 200 feet or more, but less than 1000 feet (10 points) 1000 feet or more- X (0 points) 0
Ranking Score (Total Points) 20 points	

If this is a pit closure: (1) Attach a diagram of the facility showing the pit's relationship to other equipment and tanks. (2) Indicate disposal location. (check the onsite box if you are burying in place) onsite ☐ offsite ☒ If offsite, name of facility _____. (3) Attach a general description of remedial action taken including remediation start date and end date. (4) Groundwater encountered: No ☐ Yes ☐ If yes, show depth below ground surface _____ ft. and attach sample results. (5) Attach soil sample results and a diagram of sample locations and excavations.

Additional Comments: On July 30, 2007, Highlander Environmental Corp. drilled a test water well at the well location to a total depth of 73 feet.

The test water well was allowed to stabilize for 7 days and the static water level was measured at 41 feet on August 6, 2007. The OCD was notified to witness the measurement of the water level, but was not present at the time of the measurement

Dig & Haul

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that the above-described pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines ☒, a general permit ☐, or an (attached) alternative OCD-approved plan ☐.

Date 8-8-2007

Pit Closure Plan – Drilling Pit

Operator: COG Operating LLC

Well Name: West Pearl “36” State #1

Location: Unit F, Section 36, Township 19 S, Range 34 E, Lea County, NM

The drilling pit associated with this well will be closed as per New Mexico OCD “Pit and Below-Grade Tank Guidelines” dated November 1, 2004. The visual inspection of the pit indicated that the pit liner has maintained its integrity.

1. Any remaining liquids will be removed from the pit.
2. All pit contents, including pit liner, will be excavated and disposed of at an off-site OCD approved disposal facility.
3. Soil sampling will be performed at the excavated pit area for delineation of chlorides in soils to 250 ppm. Soil samples will be taken from each of the (4) corners and (1) from the center of the pit until the chlorides are vertically delineated to 250 ppm. These samples will be screened using field chloride test kits. The final confirmation samples (5 total samples) will be submitted for laboratory analysis. The laboratory results will be submitted to the OCD District office. Upon approval from the OCD District office, the excavated pit area will be backfilled with clean material and top 3 feet of soil that is capable of supporting native plant growth.
4. Upon closure of the pit, the surface where the pit was located will be contoured to prevent erosion and ponding of rainwater over the site.
