13 Describe Proposed or Completed Operation Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No on file with BLM/BIA Required subsequent reports must be filed within 30 days following completion of the involved operations If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection)

After setting 80' of 14" conductor pipe in a 26" hole and cementing to surface with 10 yards of ready-mix, the McElvain # 9 well was spud at 6 30 A.M. on September 5, 2007 with United Drilling, Inc's Rig # 28. An 11" surface casing hole was drilled 25 feet into the Russler Anhydrite There was no indication of fresh water zones nor any lost circulation zones Maximum inclination through the surface hole was 0.75 degrees. A fluid caliper was run for cement volume determination before running 43 joints of 8.625", 32#, J55, ST&C casing. The shoe joint and next 2 joints were centralized and 7 additional centralizers were added throughout the string BJ cemented the surface casing with 425 sacks of Premium Plus 'C' cement with additives mixed at 13.5 ppg and 1.7 Yield for the LEAD cement followed by 200 sacks of Premium Plus 'C' cement with additives mixed at 14.8 ppg and 1.34 Yield for the TAIL cement. The job was completed with full returns at 6:00 A.M on September 8, 2007 after returning 16 bbls of lead cement to surface. There was no cement fall back. Operations were shut down to WOC before installing an 11"x3M wellhead, installing a 'D' spool and double ram preventer and testing the BOPs. Drill out of the surface casing commenced at 6:00 P.M on September 9, 2007 (36 hours after bumping the surface casing plug)

14 I hereby certify that the foregoing is true and correct
Name (Printed/Typed)

E. Reed Fischer

Title Senior Operations Engineer
