Decribe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimate date of starting any proposed work. If well is dir give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work)*

Variance request to change from quarterly meter calibration to semi-annual due to <100 mcfd volume

HOBBS OCD

Chevron requests of the Bureau of Land Management a variance in the calibration frequency on

the OXY Federal Com Well no. 2 Meter No. 2300250107. This well averages

appx 125 MCFD and the meter in question is not the Custody Transfer Meter, but is the Allocation meter.

The average volume is appx. 100 mcfd and has appx. 60% nitrogen. Because of the distances to reach these leases, the low volume, and the high nitrogen content, Chevron is requesting a variance to allow semi-annual calibrations and plate inspections on the meter in question. If you have any questions, please feel free to call me at the address above and thank you for your consideration.
