HOBBS OCD

13 Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimate date of starting any proposed work. If well is shut-in, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Chevron requests of the Bureau of Land Management a variance in the calibration frequency on the OXY Federal Com Well no. 1 Meter No. 2300250106. This well averages appx 41 MCFD and the meter in question is not the Custody Transfer Meter, but is the Allocation meter. The average volume is appx. 100 mcf/d or less and has appx. 60% nitrogen. Because of the distances to reach these leases, the low volume, and the high nitrogen content, Chevron is requesting a variance to allow semi-annual calibrations and plate inspections on the meter in question. If you have any questions, please feel free to call me at the address above and thank you for your consideration.
